Painted with Metal Mica
19mm (Approx. 3/4") thick PVC Only
Painted with Metal Mica
25mm (Approx. 1" thick PVC Only
Painted with Metal Mica

Exterior metal mica letters are designed for exterior use and provide the high end look of metal without the high end price. Not for use in saltwater environments. Sides can be painted any standard or custom color. Refer to installation guides and mounting adhesives shown below. For standard letter styles refer to page 29 of the SCOTT full line catalog. Custom cut letter styles and logos are also available.

Standard Metal Mica Colors: Polished Gold, Polished Silver, Brushed Gold and Brushed Silver

Care and Cleaning: All exterior letters are subject to collect water mineral deposits on the surface of the letters. To clean exterior metal mica letters use an acid based cleaner such as CLR® or Lime Away® with a soft rag.

Don't Forget the Mounting Guide - *Recommended Letter Mounting Systems*

Letter Material	Mounting Method			
	VHB	Studs	Studs/Pads	Studs/Standoffs
1/4" Acrylic, PVC Up to 10"h cap height	X	X	X	X
1/4" & thicker Acrylic & PVC Over 10"h cap		X	X	X

For permanent installations we recommend the use of proper adhesive with all mounting systems shown above. Not all letter styles are available with stud mount due to varying stroke widths. Call for letter style availability.

- Mounting Method
- Message - Caps or Lowercase
- Mounting Guide Option

A variety of mounting guides are available for a quick and easy installation.

MOUNTING METHODS - Exterior Metal Mica Letters

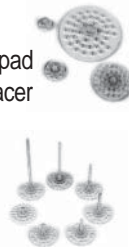

VHB - Very High Bond double sided tape. Recommended for letters under 10"

Stud - The Stud is drilled directly in the surface and attached to a pad inside letter. For use in combination with adhesive cement.

Studs/Pad - Includes a pad on both ends of the stud for mounting.

Studs/Standoffs - The Stud is drilled directly in the surface and attached to a pad inside letter. Then a standoff (or sleeve) is applied over the stud to create a spacer between the letter and the wall. Leaving the letters with a floating look spaced away from the wall surface.

Installation Mounting Templates - Note: When ordering exterior letters we highly recommend the purchase of a mounting template for ease of installation.

Mounting templates must be ordered at the time letters are ordered.

Letter Height Visibility Chart

For the most legible sign viewed at the following distances SCOTT Signs offers these suggested letter heights.

Letter Height	Distance
4"	40' - 150'
6"	60' - 200'
8"	80' - 350'
9"	90' - 400'
10"	100' - 450'
12"	120' - 525'
15"	150' - 630'
18"	180' - 750'
24"	240' - 1000'
