

# LETTERS, LOGOS & BACKGROUND MATERIAL OPTIONS

For interior display lettering and graphics, SCOTT offers you a variety of materials and laminates in different thicknesses, colors and textures. We can fabricate most any letter style or graphic from the material selection shown. Standard dimensional letter styles are on page 29. Base materials and laminates are also available as backgrounds for custom signs and sign systems.

## BACKGROUND PANELS

*Background Panels are the perfect solution for Directionals, Company Identification, Department Identification and Point-Of-Purchase Displays.*

Fabricate a wide variety of background shapes and sizes utilizing High Density Foam, Gatorfoam<sup>®</sup>, Scottcore, Acrylic, or PVC.

**High Density Foam** - The material of choice for lightweight, inexpensive overhead department ID.

**Gatorfoam<sup>®</sup>** - A premium lightweight foam which offers added durability with a hard, smooth surface of laminated wood fiber applied to the front and back.

**Scottcore** - This highly durable material is the background of choice for hi-traffic interior logo panels, graphics and more.

**Acrylic** - Extremely versatile and durable, acrylic is available in high gloss black, white or clear (back painted any standard or custom color).

### Registration

**PVC** - Fabricated from sheet material for a long lasting, affordable alternative for interior or exterior panels.

## DIMENSIONAL PRODUCTS - LOGOS & GRAPHICS

Add recognition and style to any decor with custom logos and graphics from SCOTT Signs. We offer the latest and most up-to-date technology for manufacturing quality, custom logos from your artwork. For your free quotation, fax us a copy of the artwork with your specifications to our 24 hour fax line at (941) 351-1787.

E-mail quote requests to [quote@scottsigns.com](mailto:quote@scottsigns.com).

## THE FOUNDRY FINISH

*It Looks Like Metal, It Feels Like Metal, It Is Metal!*

Your logo, letters and signs can now be metalized with our revolutionary metal finish. The Foundry finish is a genuine metal product used to create interior and exterior metal letters, dedication plaques, and custom logos for a fraction of the cost of cut or cast metal. Choose from a variety of materials including exterior photopolymer, acrylic, and PVC.

### Standard Finishes\*:

Brass and Bronze

\*Note: Due to the Foundry manufacturing process, finish colors will vary slightly.

*Exterior Signs*

*Individual & Exterior Letters*

## DURADIGITAL™

*New from SCOTT - A Revolutionay New Advance in Digital Printing!*

DuraDigital™ products from Scott Signs provide a revolutionary new advance in digital printing. The DuraDigital process provides high quality, 4 color images embedded in the substrate it is printed on. This process creates long lasting images with exceptional chemical resistance, abrasion resistance and general durability, indoors or outdoors. DuraDigital exceeds performance and price of traditional print, mount, and laminate with a lifetime guarantee against print delamination.

### Lifetime Guarantee against Print De-Lamination

- High Quality Full Color Printing
- Exceptional Durability
- Long Lasting Images
- Interior/Exterior Grade
- ADA Options Available
- Forming Capability
- Custom Substrates Available

### What about Graffiti?

DuraDigital is available in an extremely graffiti resistant product called DuraDigital Graffiti-X. Most graffiti can be removed with GOOF OFF or OOPS all purpose cleaners if cleaning occurs within a reasonable amount of time after graffiti has been applied.

Thermo form or heat bend DuraDigital prints for POP and stand up signs.

*Refer to page 51 for Digital Printing Artwork Requirements and ordering information.*

*Traditional digital printing products are also available for eye-catching 4-color backgrounds, individual letters, floor graphics, banners and more.*
